**Subject:** Gold King Mine After Action Report

Good Morning,

Please find attached to this email the after action report for the Gold King mine spill that occurred on August 5th of 2015. This report was generated utilizing the comments and

observations that were shared at the after action meeting in Durango back in November. As you know, this was a very complicated incident that impacted our communities in many different ways. This event highlights the importance of continuing to build strong relationships with our stakeholders along the watershed, and the need to create coordinated plans that will help us to respond and share information more efficiently in the future.

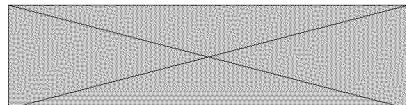

I would like to take a moment to thank all of those who participated in the after action meeting. I think it is important to note that there have already been many great accomplishments since that meeting to include the various coordinated monitoring plans, community meetings, and a new multi-jurisdictional Animas River Alert and Warning Plan that was rolled out in May to name a few.

Please feel free to distribute this after action report as you see fit, and please feel free to contact me if you have any questions.

Sincerely,

--

Trevor W. Denney B.S., CO-CEM| Regional Field Manager
